

Appl. No. 10/523,879
Amdt. dated Sept. 17, 2008
Reply to Office action of Mar. 18, 2008

Amendments to the Specification:

Please replace the paragraph on page 6, line 25
with the following amended paragraph:

The server 2 may be any suitable commercially available server capable of handling electronic messages, such as e-mail messages. The server 2 preferably is capable of supporting i-mode data communications. A communications network 3 is coupled to the server 3₂ and to remote units 4. The network 3 may be any suitable network, such as the Internet, a LAN (Local Area Network) or a WAN (Wide Area Network). The remote units 4 may be further servers which may, for example, produce electronic messages destined for the user 5.

Please replace the paragraph on page 7, line 1
with the following amended paragraph:

A communications link 6 can be established between the terminal 1 and the server 2 using, for example, antennas 7. The link 6 allows messages to be exchanged between the server 2 and the terminal 3₁. It will be understood that it is not necessary for the link to be continuous as long as the link 6 allows data to be exchanged between the server 2 and the terminal at certain intervals.
